PROFESSIONAL SUMMARY

Software Engineering student at Universiti Teknikal Malaysia Melaka (UTeM) with strong experience in Python backend development, REST API design, and building full-stack web applications. Skilled at integrating AI-powered features into web systems and developing system-level applications using C++ and MySQL. Passionate about scalable software architecture, automation systems, and data-driven solutions.

TECHNICAL SKILLS

Languages	Python, C++, JavaScript
Frameworks & APIs	Flask, REST API Development
Web Technologies	HTML, CSS, JavaScript
Databases	MySQL, SQL, SQLite
Tools & Platforms	Git, GitHub, Linux
Specialisations	AI Integration, Automation Scripting, Backend Development

EDUCATION

Bachelor of Computer Science (Software Engineering)	2024 – 2027
Universiti Teknikal Malaysia Melaka (UTeM)	GPA: 3.85 / 4.00

PROJECTS

AI-Powered Automation Reporting System	2024
iPetro Company, Malacca	
<i>Technologies: Python · Flask · AI Integration · Web Development</i>	
- Developed a full-stack web system to automate operational reporting workflows for a real-world company. - Integrated AI features to assist in generating accurate and structured reports, reducing manual effort. - Built REST API endpoints with Flask; deployed on Linux environment with production-ready structure.	
Property Management System	2024
Academic Project	
<i>Technologies: C++ · MySQL · OOP · Data Structures</i>	
- Designed and implemented a system to manage property records, tenant information, and operational data. - Applied object-oriented programming principles with efficient data handling via MySQL for persistent storage.	
University Game E-Commerce Platform	2023
Academic Project	
<i>Technologies: HTML · CSS · JavaScript · Backend Development</i>	
- Built a functional e-commerce web application for selling games online with product listings and user interactions. - Implemented core purchasing functionality and responsive UI design for cross-device compatibility.
